DASHBOARDS SHIPPED

PROFESSIONAL SUMMARY

AI-enabled Data Analyst with 4+ years in pharma commercial analytics. I build Tableau and Power BI dashboards, automated pipelines and validation frameworks, then use GenAI (Claude, Copilot, LangChain) to deliver insights faster than traditional workflows. Cut manual effort by up to 98% and report turnaround by 60%+ for global and US-based stakeholders. Now building RAG-powered, natural-language analytics for commercial teams.

KEY ACHIEVEMENTS

- ▶ Cut manual reporting effort by up to 98% with automated validation frameworks for incentive compensation.
- ▶ Reduced report turnaround by 60%+ through Python and Excel automation.
- ▶ Shipped 10+ Power BI/Tableau dashboards used by leadership and US-based stakeholders for real-time decisions.
- ▶ AI-first workflow: adopted Claude and GitHub Copilot early to speed up SQL development; now building AI automation agents.
- ▶ Owned KPI reporting end to end, from requirements and data modelling to publishing and maintenance.

TECHNICAL SKILLS

Programming Python, SQL, Advanced Excel

Analytics & BI Tableau (LOD, parameters & actions, table calculations, Server/Cloud publishing), Power BI, Power Query, Pandas, NumPy

Commercial Analytics Brand & Sales Performance, KPI Tracking, Field Force & Incentive Compensation, EDA, Business Rules for Raw Data, Data Storytelling

Data Engineering ETL, Data Modelling, Data Validation, Refresh Pipelines, dbt (learning), Airflow (learning)

AI & Automation Claude, Claude Code, ChatGPT, GitHub Copilot, LangChain, RAG, Prompt Engineering

Cloud & Tools Snowflake, BigQuery, Git, JIRA, SAP (Basic)

Core Strengths Stakeholder Management, Cross-functional Collaboration, Informal Mentoring

EXPERIENCE

Data Analyst (Incentive Compensation & Commercial Analytics) — Sanofi

Apr 2025 – Present

- ▶ Built automated SQL, Python and Excel pipelines for monthly incentive compensation across global teams.
- ▶ Developed Power BI dashboards for real-time tracking of KPIs, sales performance and incentive payouts.
- ▶ Designed automated validation frameworks that improved accuracy and cut manual effort.
- ▶ Partnered with stakeholders across regions to turn business requirements into scalable analytics and executive dashboards.
- ▶ Used Claude and GitHub Copilot to speed up SQL development and automate repetitive tasks.
- ▶ Documented pipelines and validation logic, speeding knowledge transfer and onboarding.
- ▶ Owned recurring commercial performance reporting, defining business rules to process raw sales and incentive data consistently across markets.
- ▶ Ran exploratory analysis to surface performance trends and opportunities, with clear recommendations.
- ▶ Maintained data models and refresh processes for accurate, reliable dashboards.

Data Analyst — Indegene

Jun 2022 – Apr 2025

- ▶ Built interactive Power BI and Tableau dashboards for executive decision-making across commercial teams.
- ▶ Automated reporting in Python and Excel, cutting turnaround by 60%+.
- ▶ Developed SQL ETL pipelines to transform large commercial datasets from multiple source systems.
- ▶ Performed advanced analytics on trends and operational performance to support business strategy.
- ▶ Gathered requirements from US-based stakeholders and delivered analytics across multiple business functions.
- ▶ Mentored junior analysts on SQL best practices and dashboard design standards.

- ▶ Owned a Tableau dashboard portfolio using LOD expressions, parameters, actions and table calculations, published to Tableau Server/Cloud.
- ▶ Applied visualization best practices (layout, colour, accessibility, interactivity) for decision-ready dashboards.
- ▶ Integrated multi-source commercial data for KPI and trend insights; contributed reusable templates and query standards.

Finance Analytics Intern — HighRadius

Jan 2022 – Jun 2022

- ▶ Built financial and collections analytics reports using Excel and SQL.
- ▶ Supported data cleaning and validation, improving reliability of finance reporting.
- ▶ Helped automate recurring manual reconciliation tasks.

PROJECTS

Incentive Compensation Automation [Python](#) · [SQL](#) · [Excel](#)

Automated validation framework that cut manual effort by 98% and improved reporting accuracy for global incentive compensation.

File Comparison Tool [Python](#) · [JavaScript](#) · [HTML](#) · [CSS](#)

Built a Python tool with a web interface that highlights differences between any two files, streamlining review and validation.

Executive Power BI Dashboard [Power BI](#) · [SQL](#)

Executive dashboards tracking KPIs and operational metrics, giving leadership real-time visibility into sales performance.

RAG-Based Reporting Assistant (In Progress) [Python](#) · [LangChain](#) · [Vector DBs](#)

Retrieval-augmented pipeline that lets stakeholders query commercial datasets and dashboards in natural language.

EDUCATION

SRM Institute of Science & Technology — B.Tech, Electronics & Communication Engineering

Kendriya Vidyalaya — Class XII

CERTIFICATIONS

- ▶ Microsoft Azure AI Fundamentals (AI-900)
- ▶ Google Analytics
- ▶ Statistical Hypothesis Testing (Coursera)
- ▶ LangChain, RAG & AI Agent Fundamentals
