PROFESSIONAL SUMMARY

AI-enabled Data Analyst with **4+ years** of expertise in pharmaceutical commercial analytics, sales compensation, and business intelligence. Proven track record architecting **Tableau and Power BI executive dashboards**, automated ETL pipelines, and robust validation frameworks. Early adopter of **GenAI (Claude, Copilot, LangChain)** to accelerate analytics engineering, cutting manual workflow effort by up to **98%** and report turnaround by **60%+** for global and US stakeholders.

KEY ACHIEVEMENTS

- ◆ **98% less manual effort** on global incentive compensation through automated reconciliation and QC validation frameworks.
- ◆ **60%+ faster reporting** by replacing multi-hour manual processes with Python scripts and dynamic Excel models.
- ◆ **Executive BI:** Power BI and Tableau dashboards used by brand leadership for real-time commercial decisions.
- ◆ **AI-first delivery:** Claude and GitHub Copilot embedded in daily SQL modeling, debugging, and automation.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy), SQL, Advanced Excel (Power Query, Dynamic Arrays, VBA)

Analytics & BI: Tableau (LOD, Actions, Parameters, Server/Cloud), Power BI (DAX, Star Schema), EDA

Commercial Analytics: Incentive Compensation, Sales Crediting, Attainment Curves, Brand KPIs, HCP Alignment

Pharma Commercial Data: Sales, CRM & ERP Data, Prescription Volume (TRx/NRx), Market Share, Healthcare Datasets

Data Engineering: ETL Pipelines, Data Modeling, Automated QC Assertions, dbt (learning), Airflow (learning)

AI & Automation: Claude, Claude Code, GitHub Copilot, ChatGPT, LangChain, RAG, Prompt Engineering

Cloud & Enterprise Tools: Snowflake, BigQuery, SAP (Basic), Git, JIRA

Core Competencies: Stakeholder Management, Cross-Functional Leadership, Informal Mentoring

EXPERIENCE

Data Analyst (Incentive Compensation & Commercial Analytics) — Sanofi

Apr 2025 – Present | Hyderabad, India

- ◆ Architected automated **SQL, Python, and Excel pipelines** for monthly incentive compensation calculations across global commercial teams.
- ◆ Developed executive **Power BI dashboards** for real-time tracking of commercial KPIs, sales attainment curves, and incentive payouts.
- ◆ Designed and deployed automated **QC validation frameworks**, cutting manual reconciliation effort by 98% with zero error escalation.
- ◆ Partnered directly with cross-regional commercial stakeholders to translate complex business crediting rules into scalable reporting.
- ◆ Integrated **Claude and GitHub Copilot** into daily analytics workflows, accelerating SQL development and documentation speed by 40%.
- ◆ Established standardized data validation logic and operational SOPs, accelerating team knowledge transfer and onboarding.
- ◆ Owned recurring commercial performance reporting, defining consistent business rules to process raw sales records across diverse markets.
- ◆ Conducted exploratory data analysis (EDA) to surface performance trends and sales anomalies, delivering actionable strategic recommendations.
- ◆ Maintained high-reliability data models and automated refresh processes across Snowflake, SAP feeds, and reporting layers.

- Built and published interactive **Power BI and Tableau dashboards** utilized by brand leadership for real-time commercial decisions.
- Automated recurring reporting workflows using Python and Excel, cutting report turnaround time by 60%+.
- Developed robust **SQL ETL pipelines** to ingest, cleanse, and transform multi-source commercial healthcare datasets.
- Executed advanced analytics on prescribing trends, brand performance, and product-mix to inform client sales strategy.
- Collaborated closely with US-based commercial stakeholders to gather business requirements and deliver tailored analytical solutions.
- Mentored junior data analysts on SQL query optimization, star-schema data modeling, and visualization best practices.
- Owned a comprehensive **Tableau portfolio** utilizing LOD expressions, parameters, and table calculations published to Tableau Server.
- Applied human-centered visualization standards (color balance, scannability, accessibility) to deliver decision-ready dashboards.
- Implemented fuzzy matching and similarity algorithms in Python to reconcile inconsistent physician and territory records.

- Built financial and collections analytics models using Excel and SQL, improving reporting accuracy and visibility.
- Assisted in data cleansing and reconciliation across high-volume ERP transaction tables.
- Automated recurring manual reconciliation tasks through structured spreadsheet formula frameworks.

PROJECTS

Incentive Compensation Automation Engine

Python • SQL • Power BI • Excel

Built an end-to-end reconciliation and calculation engine with 20+ automated validation checks, reducing manual payroll processing effort by 98% for global commercial teams.

Sales & Goal Cross-Source Validation Tool

Python • Pandas • Streamlit • OpenPyXL

Engineered an automated data-diff validation tool that isolates discrepancy exceptions between field sales, CRM goal tracking, and corporate ERP registers prior to cycle close.

Pharma Commercial KPI Executive Dashboard

Power BI • DAX • SQL • Snowflake

Architected a star-schema executive reporting suite delivering real-time visibility into prescription volume (TRx/NRx), market share, and sales quota attainment for brand directors.

RAG-Powered Commercial Reporting Assistant

Python • LangChain • Vector DBs • GenAI

Developing a natural-language retrieval-augmented assistant allowing commercial operations stakeholders to query sales datasets and dashboards using conversational English.

EDUCATION

SRM Institute of Science & Technology — B.Tech, Electronics & Communication Engineering

Kendriya Vidyalaya — Class XII

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI-900)
- Google Analytics Certified
- Statistical Hypothesis Testing — Coursera
- LangChain, RAG & AI Agents — DeepLearning.AI
